## INFORMATION SYSTEMS SECURITY GROUP

SUMMARY REPORT - July 1974

### HIGHLIGHTS

1. The Chief, Information Systems Security Group (ISSG) and representatives from the Office of Weapons Intelligence and the Office of Joint Computer Support met with Mr. Wattles, former Director of Personnel at the request of Mr. Blake. Mr. Wattles briefed those present regarding a safeguard system software evaluation program used in missile launching systems. The idea of this system is to certify the correctness of the data and the program associated with missile launchings. Arrangements were made to explore the possibilities of using such a test system in CIA computer operations. A briefing has been arranged with National Security Agency personnel knowledgeable of the evaluation program.
2. The initial phase of the National Photographic Interpretation Center (NPIC) analysis, test, and evaluation has been completed; viz., the analysis. The evaluation and report will be completed by the end of September 1974.
3. The new Chief, ISSG, has been appointed the Information Systems Security Officer for the Agency vice the former Chief, ISSG.
4. Representatives of ISSG, the Office of Communications, Physical Security Division, and IBM met to discuss the problem of the introduction of new equipment to the Agency. Historically, new equipment has been introduced through sales representatives with little or no regard for security ramifications. It is hoped this liaison between the interested components and IBM will continue and be extended to other vendors.

5. On 12 July 1974 the Computer Security Seminar presented by the Information Systems Security Group was completed. The student critiques of the seminar indicated the speakers and the content were well received.

6. ISSG provided a computer security briefing for the Office of Joint Computer Support ADP Orientation course.

7. The semi-annual inventory of Joint Chiefs of Staff and CENTO documents was completed and certified during July.

8. A member of ISSG attended the Department of Defense Computer Institute computer security course.

ANALYSIS

The case load in ISSG remained stable during the month. Although people have been designated to fill the slots in the ISSG Policy Branch, they have not reported for duty to date. It is anticipated that both of these personnel will be on board in ISSG by mid-October 1974. In addition, announcement was made by the Office of Security that one member of the Certifications Branch will be transferred to the Technical Security Division. A vacancy notice has been circulated for this position.

TRENDS

Information Systems Security Group intends to continue closer liaison with the Office of Joint Computer Support and establish better liaison with the computer components in the National Photographic Interpretation Center. Regarding the latter, ISSG plans to provide guidance to NPIC in the design of their new computer system installation of which will start during the last quarter of Calendar Year 1974. Due to the number of new employees in ISSG, training will continue to be a heavy requirement of this office.

Trends and Highlights

July 1974

1. At the recommendation of the Audit Staff, concurred in by the Director of Logistics, the Central Stamp Fund has been discontinued. Effective 1 July 1974, Office stamp supplies will have to be replenished from Office of Security Imprest Funds. This will necessitate having the Office of Security absorb approximately \$6000 annually for the cost of postage previously supplied by the Office of Logistics until this time can be budgeted.

2. Another recommendation of the Audit Staff was to decentralize the Office's single [REDACTED] into separate accounts for the Technical Security Division and each field office. The Director of Security has concurred in this recommendation. The concurrences of the Directors of Finance and Logistics are also being obtained.

3. A draft Annual Personnel Plan for the Office was approved by the Director of Security on 29 July. The final preparation and submission of the plan is expected well before the 16 August deadline.

4. The Office Candidate Selection Panel completed its review of files. Individuals selected are being processed for entering on duty. At this point in time, it is anticipated that the Agent Training Course will begin in September.

5. The final meeting with the Position Management and Compensation Division, Office of Personnel, has been held. A paper is in preparation for the Director of Security's signature on the Office's position for forwarding to the Director of Personnel.

6. Space reconfiguration in the Command Center, Badge Office, and the Interrogation Branch is proceeding on schedule. Excess furniture, wiring, and equipment has been removed to permit the renovations to be undertaken.

MEMORANDUM FOR: Deputy Director of Security (P&M)

SUBJECT : SRD Work Measurement Data

1. Attached is a copy of the SRD Work Measurement Statistical Report for FY 1975 covering the period through 31 July 1974.

2. Examination of these statistics and those for the same period in 1973 reveals significant increases in Computer Support, Microfiche and Compartmented Information activities. Modest increases occurred in Indices, Communications, Case Analysis, File Retirement and Outside Agency Name Check activities.

3. Small decreases appeared in Information Processing Check and Case Processing activities. A notable decrease has occurred in Filing activities which may indicate a long term trend towards a lower level of work.

MEMORANDUM FOR: Chief, Plans and Programs Branch  
SUBJECT : Office of Security Monthly Report

1. Forwarded herewith are the statistics for the Personnel Security and Investigations Directorate (PSI) for the month of July 1974.

2. Clearance Division statistics for the month of July 1974 as compared to June 1974 reveal a slight increase in total receipts but a decrease of approximately 100 cases involving field investigation. Total completions for July exceeded June completions by approximately 200 cases with a corresponding increase of approximately 100 cases involving field investigation. These figures do not indicate any significant trends at this time.
